### **DETAILED ACTION**

In response to the communication filed on April 7, 2004, claims 21 and 38 are active in this application.

#### ***Information Disclosure Statement***

The information disclosure statement filed on July 11, 2003; September 8, 2003 and November 10, 2003 have been considered.

#### ***Oath/Declaration***

Oath/Declaration filed on July 11, 2003 has been considered.

#### ***Specification***

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2813

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 21 and 38 are rejected under 35 U.S.C. 102(e) as being anticipated by Kim, U.S./6,365,450 B1.

Kim teaches a method for forming a semiconductor device, which comprises forming on a substrate a dielectric layer 214 (fig. 3; col. 5, line 65 to col. 6, line 6) that has a dielectric constant that is greater than the dielectric constant of silicon dioxide; forming a sacrificial layer 216 (fig. 3) or 224/228 (fig. 4) on the dielectric layer; removing the sacrificial layer (fig. 11); and then forming a gate electrode 272/274 (fig. 15) on the dielectric layer, see figs. 1-20; cols. 1-16 for more details.

Re claim 38, wherein the gate electrode 272/274 (fig. 15) is formed directly on the dielectric layer.

### ***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 21 and 38 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No. 6,617,209 B1.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed subject matter is within the scope of the prior art.
